PEONY-FLOWERED TULIPS

Double May-Flowering

A wonderful group of recent introduction that has taken the garden world by storm. The size of the blooms equals that of regular peonies, and they are every bit as double and colorful. Their height of 20 to 22 inches makes them ideal for beds or borders without any fear that heavy winds will beat them down.

Coxa. Very large, substantial blooms of rich crimson-red with the petal edges finished with a narrow seam of creamy white. BT 509 A. 5 for 90c; 10 for $1.65; 25 for $3.80.

Precious Little Midgets

These wild Tulip species, native to countries adjacent to the eastern end of the Mediterranean, have special charm and grace. Though midgets indeed if compared with the horticultural varieties, they are lovely beyond imagination, and every garden should include its share of these delightful wildlings.

←— CLUSIANA

Lady and Candystick Tulip are its two popular names. Very lovely, with the three cherry-red outer petals creating a striking contrast to the creamy white interior. 18 in. BT 709 A. 5 for 70c; 10 for $1.25; 25 for $2.80

HYACINTHS

Hyacinths are wonderful garden flowers whether planted in solid beds or borders, in front of shrubs, or as little groups to fill the flower border with brilliant color during the early spring. They are perfectly hardy, easy to grow and will thrive for years if covered five to six inches deep. They also are easy to grow for winter-flowering in the house and there is no easier, cleaner, and surer method than raising them in our special Hyacinth vases filled with water.

Exhibition Hyacinths

These extra-large bulbs give by far the largest and heaviest flower trusses. They are the best for water culture, forcing in pots or pans, and where the most showy display is wanted in the garden.

City of Haarlem. A mellow shade of deep primrose-yellow and a wonderful dense flower spike. BH 209 A.

HYACINTHS and Imported Glass Vase

If you never have grown Hyacinths in water-filled vases, you have missed the most exciting experience any gardener could have. Just place the bulb upright in the top bowl of these exquisite, opalescent glass vases, fill with water to barely touch the bulb, and put in a cool dark place until the roots curl around the bottom and the thick fat shoot is three inches high. Then move to a warmer place, keeping the top covered with a cone of dark paper to draw out the flower spike. After that, a sunny window will force development of the large, colorful flower truss that will permeate the entire room with a rich oriental fragrance.

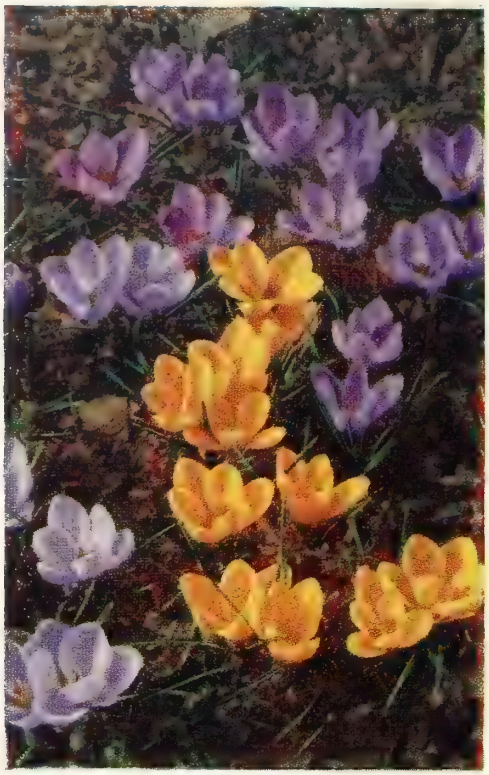
BUSY LITTLE ELFINS

Yes, They Are Busy—Bringing More Joy to Your Spring Garden



SPRING CROCUS

Here we have those glamorous lovelies that mean so much to us because they are the first to lift their heads while winter is far from gone. Ever since childhood the first Snowdrop has meant the beginning of a new season, with all its thrills and promises. Winter Aconite, resembling golden yellow buttercups, is its worthy companion in the earliest outdoor flower display. Soon Crocuses join the Parade with a wealth of bright colors, and from then on others just keep the gardener busy admiring their charm and loveliness. Glory-of-the-Snow and Scillas introduce the first true blue shades and soon are joined by Grape Hyacinths, with the richly fragrant Jonquils adding brilliant yellow for a striking contrast. Before long Snowflakes lift their graceful white bells above a mass of bright green foliage. You need them all to give the garden that perfect, finished look.

Spring-Flowering CROCUS

Of course, you want Crocus, lots of them, planted in groups or drifts with the bulbs spaced 2 to 3 inches apart, and covered about 3 inches deep. They are wonderful in sunny nooks and corners, in the foreground of the flower border, or naturalized in the lawn. To make them last there you must not cut the grass until their leaves have turned yellow. Take your choice of colors or plant the mixture.

Purpurea grandiflora. Very large, bright purple goblets that present a striking contrast if planted adjoining Yellow Mammoth. BM 82 A. 10 for 50c; 100 for $3.00; 250 for $7.25.

Remembrance. By far the finest in this color—a pleasing lavender shade of good brilliance and purity. BM 83 A. 10 for 50c; 100 for $3.00; 250 for $7.25.

Snowstorm. Glorious pure white goblets opening wide in full sun into great white stars with yellow anthers. BM 84 A. 10 for 55c; 100 for $4.60; 250 for $11.00.

Yellow Mammoth. Nothing can beat a mass of these brilliant yellow cups basking in the spring sun. BM 81 A. 10 for 75c; 100 for $6.30; 250 for $15.25.

All Colors Mixed. BC 450 A. **10 for 55c; 100 for $4.30; 250 for $10.00**

Enchanting JONQUILS

JONQUIL
GOLDEN SCEPTRE

These like a moderately moist soil yet where no water stands for any length of time. Though small so far as flower size is concerned, they have an alluringly sweet fragrance and their bright yellow color makes them conspicuous among the green leaves.

Golden Sceptre. A perfect miniature counterpart to a Giant Trumpet Daffodil, with finely sculptured trumpet and star-shaped perianth—all of a brilliant golden yellow color. BM 328 A. 5 for 90c; 10 for $1.70; 100 for $13.80.

Single Sweet-Scented. A real gem carrying its rich deep yellow flowers amidst rush-like leaves and emitting an enticing, rich fragrance. BM 339 A. 5 for 80c; 10 for $1.50; 100 for $12.50.

Campernelle Double. Sprightly double yellow flowers of graceful shape carried on stiff stems and emitting a lingering perfume. BM 323 A. 5 for 65c; 10 for $1.20; 100 for $10.00.

ALL BULBS SENT PREPAID within the U.S.A.

← GLORY-OF-THE-SNOW

Glory-of-the-Snow • CHIONODOXA

Luciliae. One of the most satisfactory of all the "little bulbs," so easy to grow and exceptionally persistent, with plenty of seedlings springing up all around the original planting. Bears graceful six-pointed stars of delft-blue flowers shading to white toward the center. Each little stem carries several blooms. BM 412 A. 10 for 50c; 25 for $1.10; 100 for $4.00.

Speed Up Planting with This Handy Bulb Planter

You will be amazed how quick and easy it is to plant all kinds of bulbs with this tried and tested tool. Just push into the soil, lift the core and place bulb on the flat bottom that provides a solid base. X 570 A. **95c**

GRAPE HYACINTHS

Grape Hyacinths
Muscari

Heavenly Blue. A most adorable early May treasure bearing great masses of lovely bell-shaped blooms in quaint grape-like clusters. Of a fine clear light blue color with white fringe. BM 441 A. 10 for 40c; 25 for 85c; 100 for $3.00.

White. So delicate, yet one of the hardiest and most persistent. The dainty white pearls clustered at the top of the sturdy little stem like a bunch of inverted grapes are so sweet. BM 442 A. 10 for 50c; 25 for $1.15; 100 for $4.25.

SNOWDROPS

Snowdrops
Galanthus

Nivalis. Even before all the snow is gone, this earliest of all spring messengers will lift its pert little white bells amidst a foil of bright green leaves, much to the delight of the gardener who anxiously is waiting for winter to depart. For best effect plant in groups or little colonies with the bulbs spaced about an inch apart. BM 691 A. 10 for 65c; 25 for $1.50; 100 for $5.50.

Scilla sibirica • *Siberian Squill*

Blue. You will anxiously be waiting for these little blue stars to join the spring parade in your garden because so far no really blue flowers have made their debut. Lovely for small bouquets though only 6 inches tall. BM 684 A. 10 for 50c; 25 for $1.10; 100 for $4.00.

Spring Beauty. Once planted, you may look forward to finding more and more flowers, year after year, borne by offset bulbs which it produces in great quantities. The graceful pendent bells are an intense rich blue—a shade that is found in very few other plants. BM 683 A. 10 for 55c; 25 for $1.25; 100 for $4.50.

WOOD HYACINTHS

Wood Hyacinths
Scilla campanulata

SCILLA SIBIRICA

The ideal solution to the shade problem, for they just love a shady spot and even thrive under trees, including pines. Yet they do as well in full sun. Graceful bells on 12-inch stems.

The Loveliest of Lovelies

PAPERWHITE NARCISSUS

So Fragrant . . . So Easy to Grow

Of all indoor bulbs none are more popular than Paperwhites, and the easiest method is growing them in a bowlful of Mica-Gro with enough water to just touch the bulbs. If possible, keep in a dark cool place for two weeks, but that is not essential to success. Bring to a sunny window and keep between 55 and 70°. The cooler they are grown, the stockier the plants.

To insure a continuous display, start a bowlful or two every ten days from early December until early March. But in order to be able to do that, you will have to buy now. The bulbs keep well in a cool, dark place in a shallow tray and held upright with strips of paper.

We offer the finest French-grown bulbs, which are the only ones that have given consistently satisfactory results.

Mammoth Bulbs: BI 490 A. 5 for 65c; 10 for $1.20; 25 for $2.75.

As easy to grow as Paperwhites but a little slower to come into bloom. Large clusters of golden flowers with orange cup. Monster Bulbs: BI 492 A. 5 for 80c; 10 for $1.45; 25 for $3.30.

Chinese Sacred Lily

Another favorite for growing in Mica-Gro but stronger throughout, with clusters of blooms in which the perianth is white and the cup yellow. Jumbo Bulbs: BI 493 A. 5 for 85c; 10 for $1.50; 25 for $3.45.

Copper Bowl and Paperwhites

with a Winter Windowsill Display

Fragrant Freesias

Most home gardeners do not realize that they can grow Freesias as beautiful as those produced by commercial florists. The secret to success lies in providing a very bright window where the temperature can be controlled to stay between 48 and 60°. Plant in shallow pans filled with humus-enriched soil so that the tips are above the surface. Water well once and keep out of sun. When growth begins, move to the light and give water, sparingly at first, more later on.
